

# TWISTS ON BOXES

## Tessellations and more 3

With a prologue written by Tomoko Fuse and hand drawn pictures done by Felipe Moreno, it contains 25 self-designed boxes, based on my tessellation models. You can see models with square and triangular grids, designed with single twists, stacked twists and no twists.

Ordered by grid size, each model includes the CP, step by step detailed instructions, and finished model pictures. Also picture of brooches folded with the same designs.

At the end, you can find references to models of my previous books (with pictures of boxes based on those models).
