

# Flying Saucer

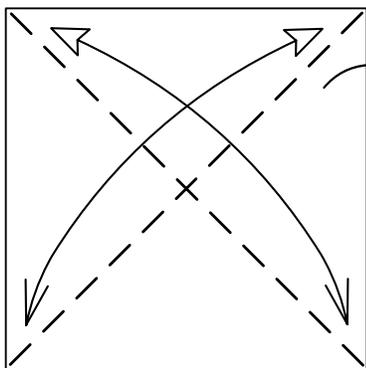

John Szinger

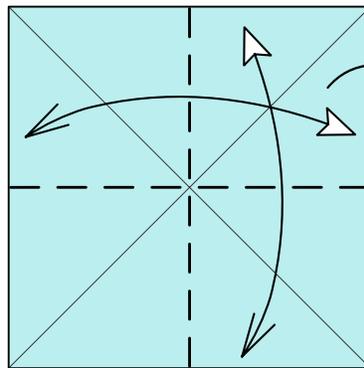

An advanced starship of Martian invention, this craft is suitable for long distance interstellar voyages. It can warp space and time to travel faster than light.

Fun "fact": the beings know to us as Martians did not originate on Mars, but travelled from another solar system thousands of years ago. They have been quietly watching the humans and visiting the earth for some time.

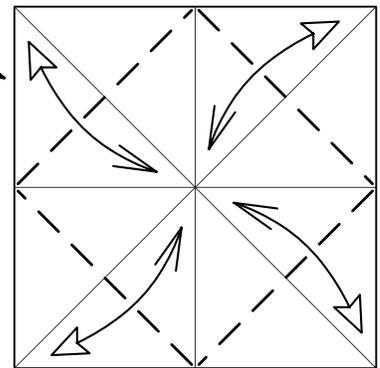

Recommended paper: 6" or larger square. Begin with a square, white side up.

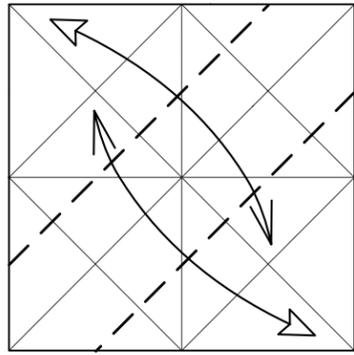

1. Fold and unfold on the diagonals. Turn the model over.

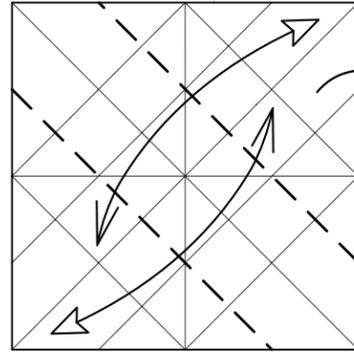

2. Fold and unfold on the square axes. Turn the model over.

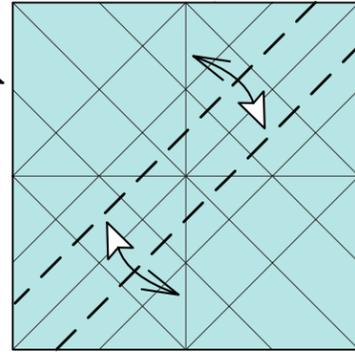

3. Blintz fold and unfold.

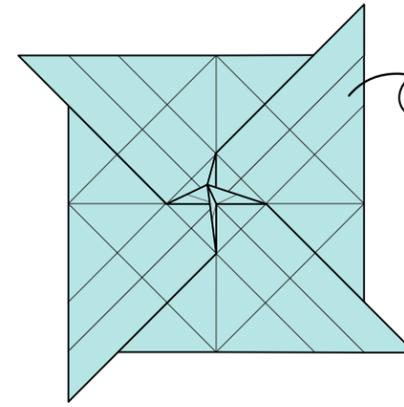

4. Fold and unfold.

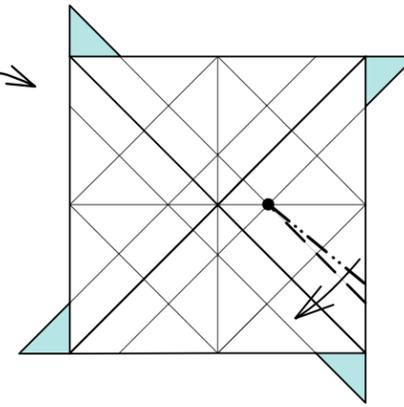

5. Fold and unfold. Turn the model over.

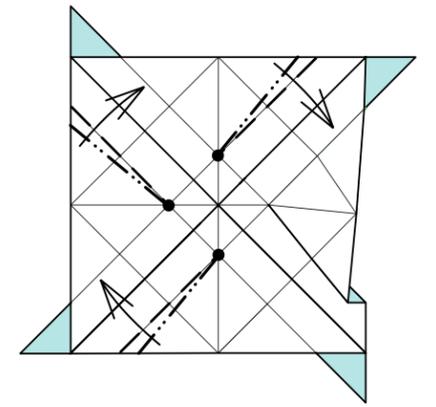

6. Fold and unfold.

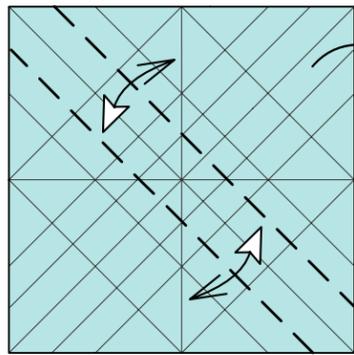

13. The center is like a pyramid. Turn the model over.

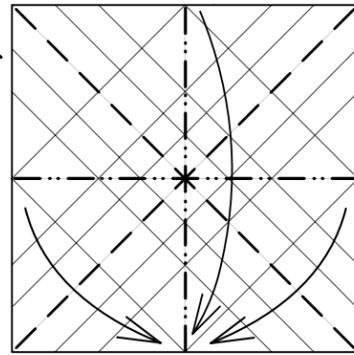

14. Crimp from the point. The model becomes slightly bowl-shaped.

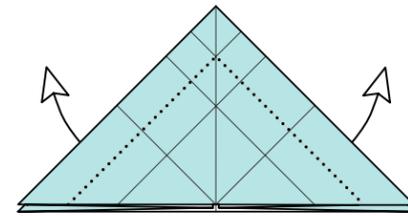

15. Repeat step 15 three more times.

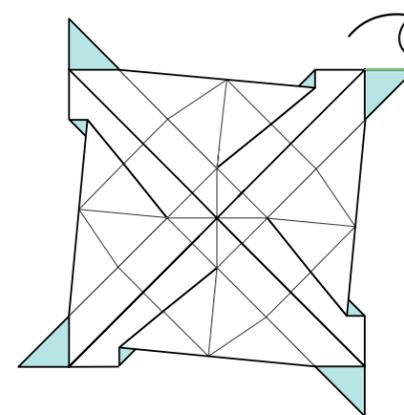

7. Fold and unfold. Turn the model over.

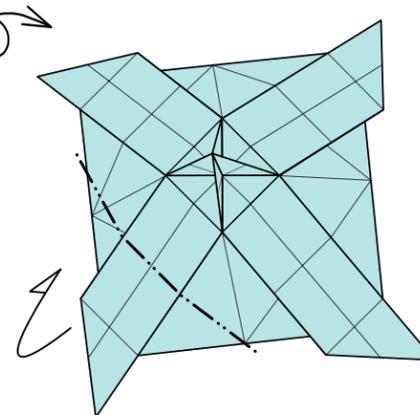

8. Waterbomb base.

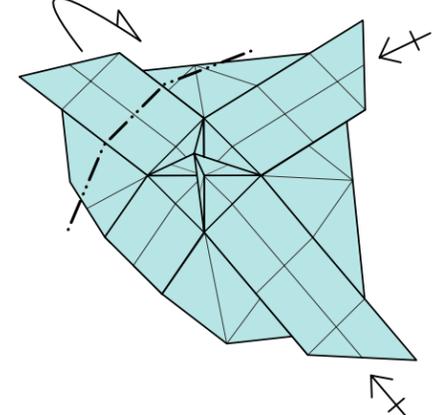

9. Reverse folds on hidden creases.

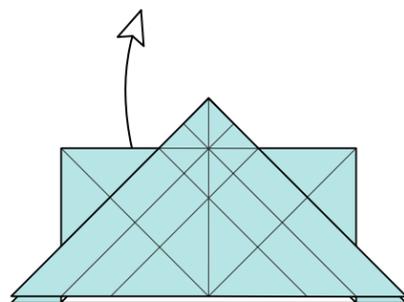

16. Turn the model over.

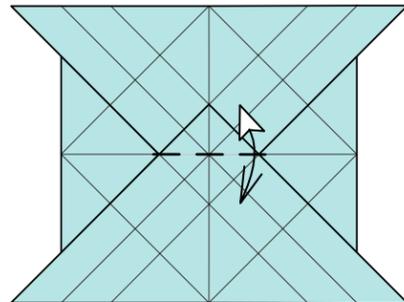

17. Fold a flap underneath. The model is not flat, but the fold is a straight line.

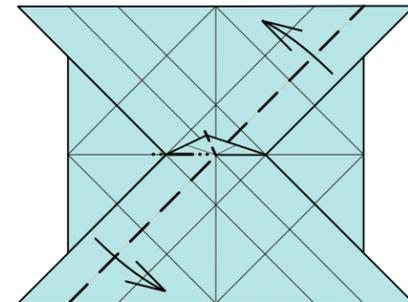

18. Repeat step 18 on the other three sides.

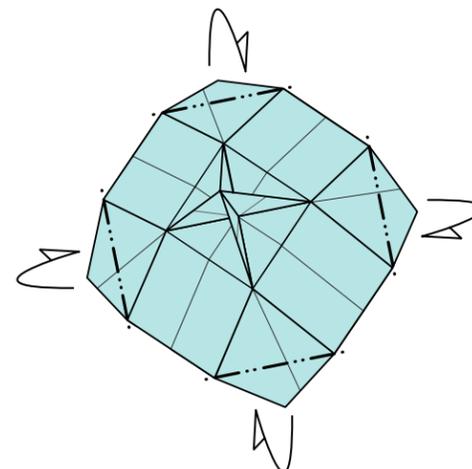

10. Fold the far flap up.

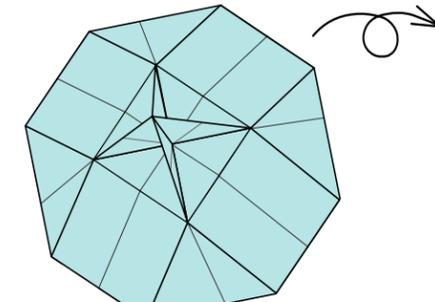

11. Fold the flap in the middle to stick up from the model.

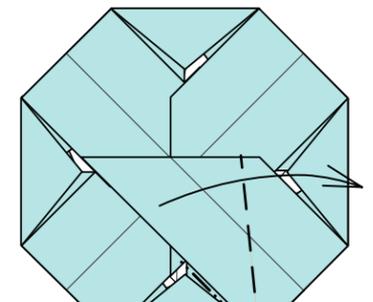

12. Reverse folds.

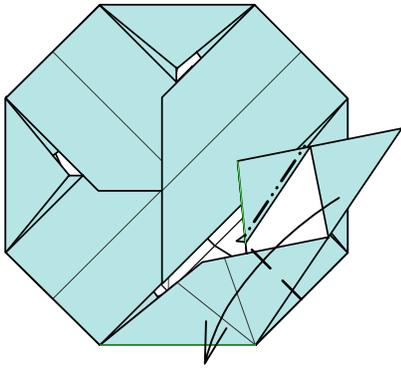

19. Fold the four corners underneath.

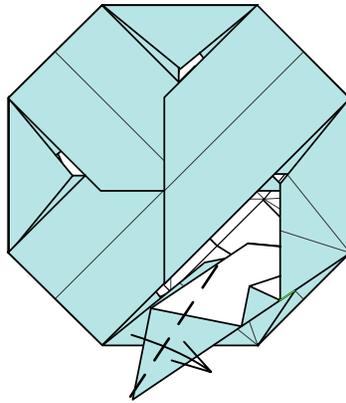

20. Turn the model over.

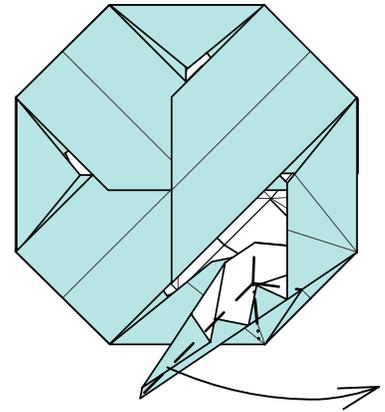

21. Fold a flap to the right and flatten, pulling out a layer underneath.

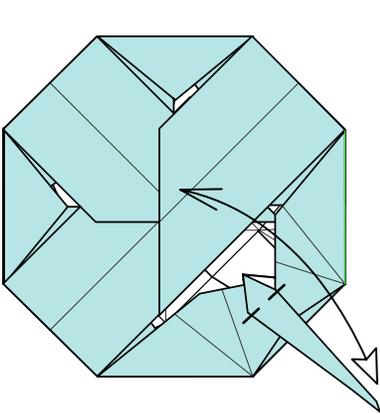

**22.** Squash-fold downward, again pulling out a layer underneath.

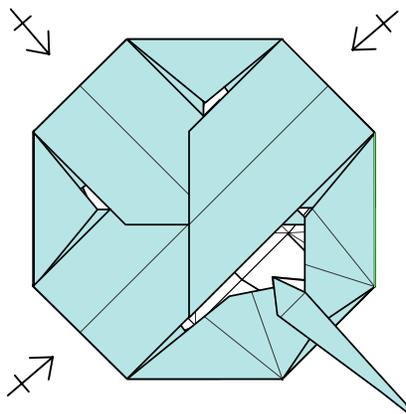

**23.** Valley fold to narrow the point.

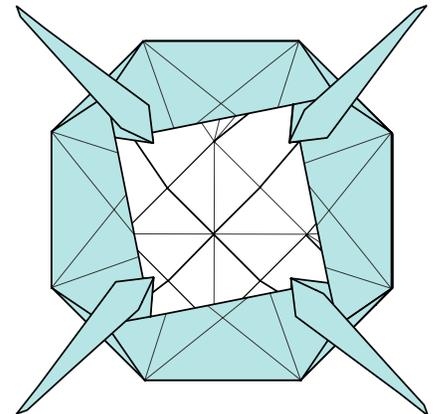

**24.** Rabbit-ear.

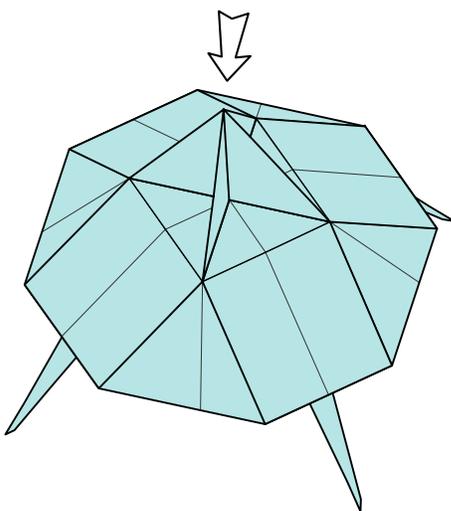

**25.** Fold toward the center and unfold.

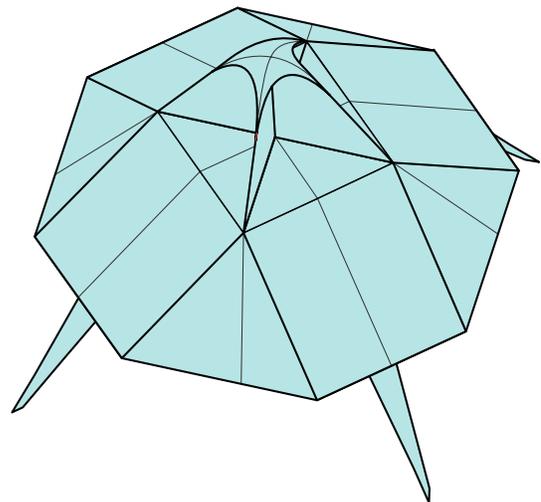

**26.** Repeat steps 22 - 26 on the three remaining flaps.

**27.** Turn the model over.

**28.** Push in the top of the pyramid to make it dome-like.

**29.** Flying Saucer.
